

Free Software

And the communities behind IT

Phil Bass, January 2025

Phil's Tips:

1. Never Buy a Cheap Computer

Because in 3 or 4 years it will be slow, and you'll be tempted to buy a new one.

2. Never Buy Software

Because there is always a free app that does (more or less) what you want. I will show you some of them in this presentation.

Operating Systems

- Two PC ecosystems:
 - Microsoft Windows
 - The Unix Family
- Apple's MacOS & iOS, Google's ChromeOS & Android, and Linux are all varieties of Unix.
- The Unix family runs on two thirds of the PCs, laptops, tablets and smartphones in use today.
- Three quarters of Internet servers run Linux.
- Overall, Windows is in a minority!

GNU/Linux

GNU/Linux

- Linux is the free version of the Unix OS.
- It was written by Linus Torvalds in 1991.
- It runs on phones, tablets, laptops, desktops ...
- All the supercomputers in the world run Linux.
- It can revitalise an old Windows machine.

GNU/Linux

- Strictly speaking, Linux is just the OS kernel
- Linux distributions come with the GNU utilities
- There are many distributions:
 - e.g. Ubuntu, Debian, Mint ...
- They come with a different selection of utilities
- A Linux app runs on all distributions

GNU/Linux

- The basic utilities are included in your installation:
 - File Manager
 - Email app
 - Web Browser
 - Office Suite (word processor, spreadsheet ...)
 - Contacts, Calendar, Notes, Package Manager, etc.
- And you can add many more.

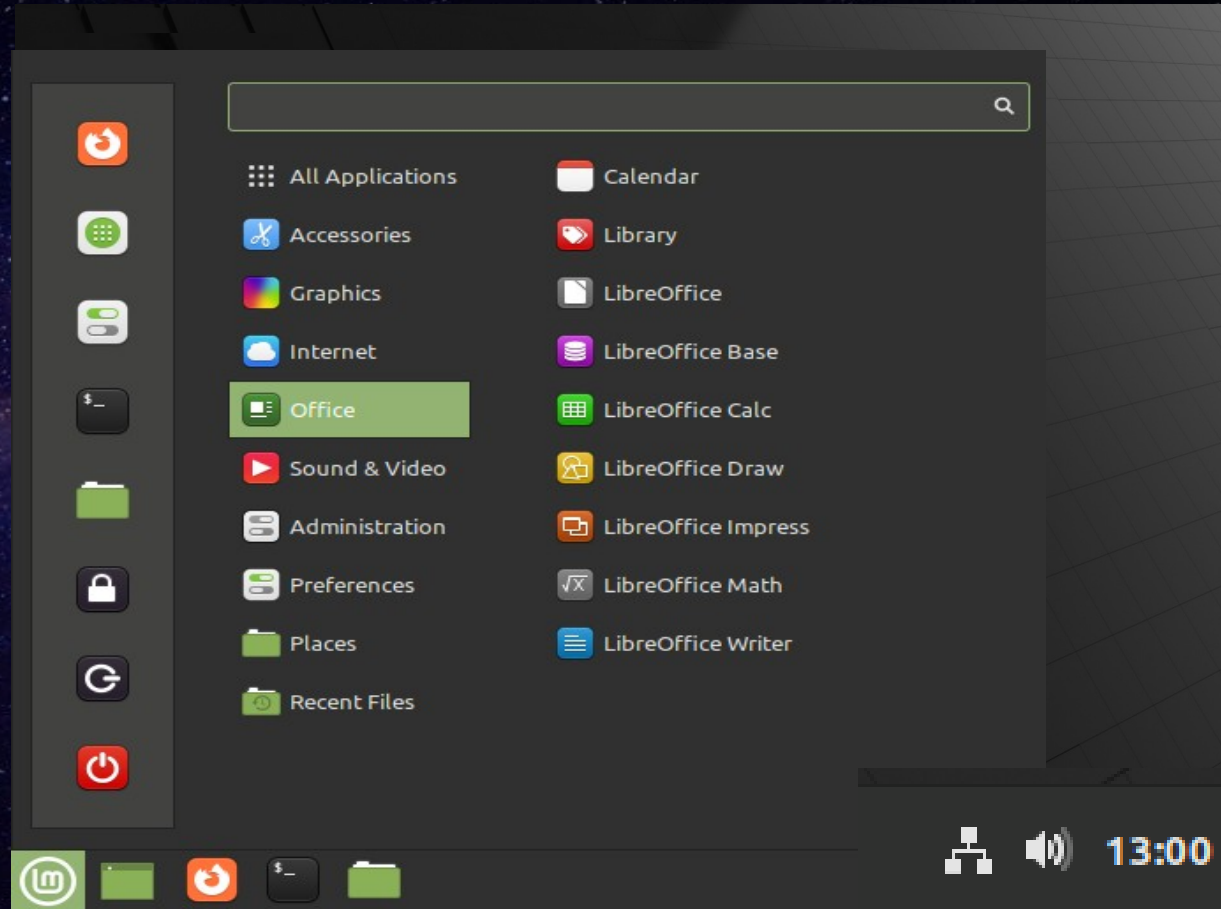

GNU/Linux

“Quality was maintained not by rigid standards or autocracy but by the naively simple strategy of releasing every week and getting feedback from hundreds of users within days, creating a sort of rapid Darwinian selection on the mutations introduced by developers.”

Linux Mint

The desktop and apps window, running from a USB stick.

Clicking the CD icon installs Mint on the PC's hard disk/SSD.

Firefox

Firefox

- Firefox is a child of the Netscape web browser
- It was started in 2002 and first released in 2004
- It became significantly faster in 2017
- It is owned by the non-profit Mozilla Foundation
- It prides itself on privacy, security and speed

Firefox

“Ads are distracting and make web pages load slower while their trackers watch every move you make online. The Firefox Browser blocks most trackers automatically, so there’s no need to dig into your security settings.”

Thunderbird

Thunderbird

- Thunderbird is a fully-featured email client.
- It was first released in 2003.
- It is owned by the non-profit Mozilla Foundation.
- It prides itself on privacy and security.
- It is implemented as a mail interface to Firefox.

Thunderbird

“Thunderbird is funded by user donations. We don’t collect personal data, sell ads in your inbox, or secretly train AI with your private conversations. Thunderbird is open source. As part of the Mozilla family you can be confident we always put your privacy and security first.”

[View in browser](#) UK Edition | 13 December 2024

The Conversation

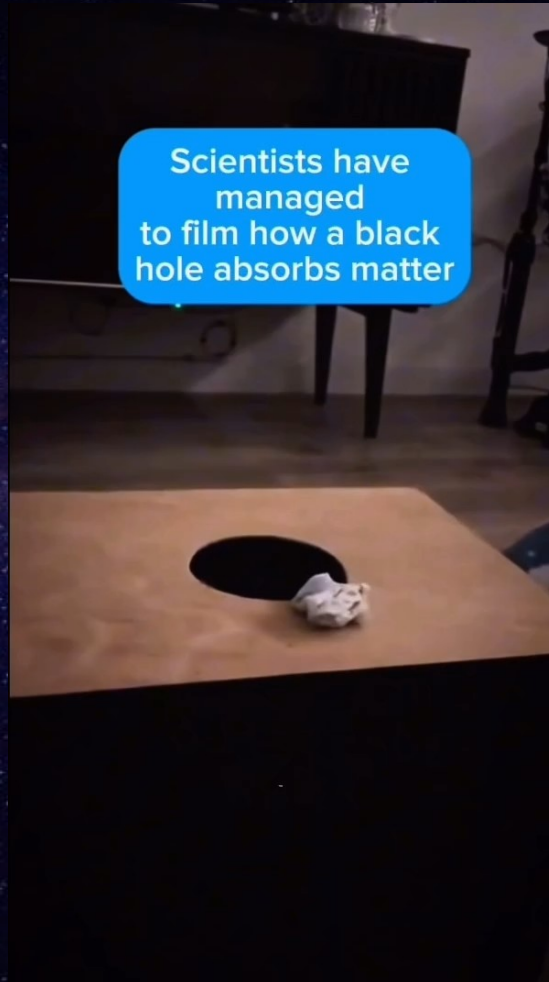

Christmas TV ads have become a festive feature as familiar as mistletoe and mince pies. Big stores and brands spend huge sums appealing to our need for more stuff to consume. But if you think it's tough coming up with new gift ideas for your loved ones year after year, just imagine the pressure of spending a big pile of a company's budget finding a new way to persuade people to buy things.

LibreOffice

- LibreOffice is a suite of office apps:
 - **Writer** word processor
 - **Calc** spreadsheet app
 - **Impress** presentation editor
 - **Draw, Base, Math**
- It was forked from OpenOffice in 2010.
- It is owned by the non-profit The Document Foundation.

The Fediverse

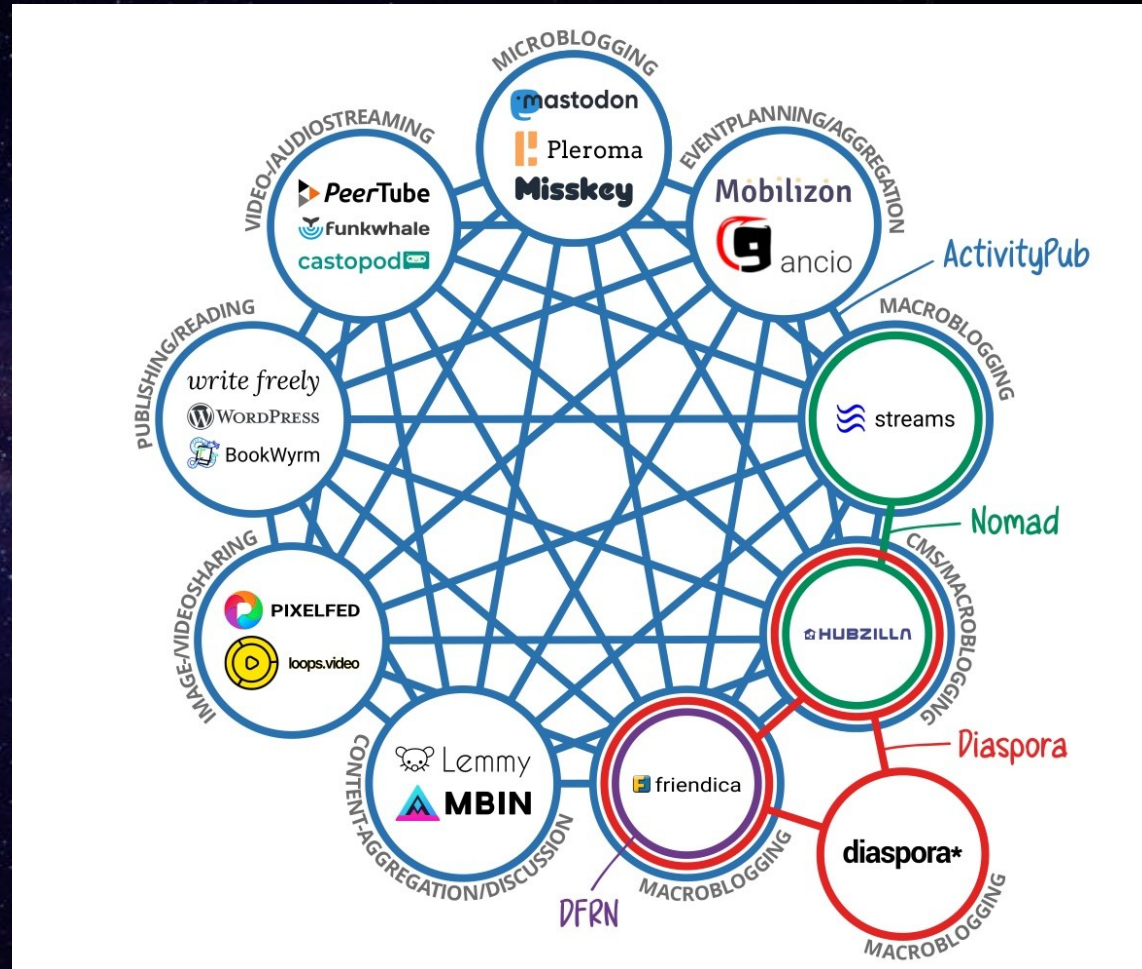

In a Nutshell

- Social Networking
- Blogs
- Photos
- Music
- And more ...

The ActivityPub Protocol

- Social Media
- Micro Blogging
- Macro Blogging
- Photo Sharing
- Video Sharing
- Content Management
- Content Aggregation

A Few Fediverse Sites

Mastodon

- Decentralised Microblogging
 - Social networking service
- An alternative to X/Twitter
 - ‘Toots’ instead of ‘Tweets’
- 500 character posts
- Server-specific moderation

A Few Fediverse Sites

Friendica

- Decentralised Microblogging
 - Social networking service
- An alternative to Facebook
 - Friends & Newsfeeds
- Multiple profiles/uses
- Extensible via plugins
- 🎓 crotchety@friendica.world

Key				
✓ = Supported feature.				
✓ = Optional feature that usually has to be activated. Some servers may have this feature disabled or limit your options.				
⚡ = Supported, but not necessarily in a way that you expect. May require advanced configuration or extra steps.				
⊕ = Supported via a Third Party.				
✗ = Not supported.				
Note: Administrators have the option to change the configuration of their own server, which may effect the features that are available to users.				

Hubzilla's Stream

- Post List
- Selected Post
- Content
- Notices

The screenshot displays the Hubzilla.de web interface. At the top, the site name "Hubzilla.de" is visible. The main content area is a stream of posts. A red box highlights a specific post by Manuel JF, titled "No 10 Peironcelly street, Madrid in 1936". This post features a black and white photograph of a severely damaged brick building facade. A large, dark oval with a red border is overlaid on the post, containing the email address "phil@hub.hubzilla.de". To the left of the main stream, there is a sidebar with a "Hubzilla Upgrade Info" notice and a list of other posts. To the right, a "Network" sidebar shows counts for "Network" (3), "New Connections" (4), and "Forums" (3).

Hubzilla Upgrade Info

Your channel has been upgraded to Hubzilla version 9.4.4

Hubzilla as an App

On a mobile device, you can use Hubzilla like an ordinary app. To make this work, visit the Hubzilla website, sign in, and tell your web browser to 'Add to home screen'.

Group Discussion

The background image shows a close-up, shallow depth-of-field view of a meeting table. In the foreground, a person's hand in a dark blue sleeve is writing on a tablet. In the mid-ground, another person's hand in a light blue sleeve is writing on a document. The table is cluttered with papers, sticky notes, and a tablet. The background is softly blurred, showing a computer monitor, a vase with greenery, and a window with bright light.

The Pros and Cons

1. **Cost** (Photoshop, Adobe's PDF Editor, Sibelius & Finale)
2. **Quality** (Functionality, Aesthetics, Intuitiveness)
3. **Support** (Apple , Linux ?, Google ?, Microsoft )
4. **Platforms** (Windows, MacOS, Android, Linux)
5. **Familiarity** (MS Word, Facebook, etc.)
6. **Control** (mega-corporation or individual user)

Greed vs Altruism

“It is better to give than to receive.”

Which I interpret as:

“It is better to give your time, money, skills and wisdom to others than to encourage others to give their time, money, skills and wisdom to you.”

Thank you!
